

# MZ 1200DBR

## Trait:

**VT Double PRO®**  
RIB COMPLETE

VT Double  
PRO® RIB  
Complete®  
Corn

**CHU:** 2050      **RM:** 72

## Product Features:

- Earliest VT2P launched in Canada
- Excellent seedling vigour for early stand establishment
- Impressive harvest intactness
- Strong test weight and grain quality

## Agronomy Notes:

MZ 1200DBR combines ultra early maturity with exceptional yield and test weight. Plants have rapid spring vigour for quick canopy closure. Plants flower 1 day earlier vs E44H12 R and have similar ear and plant height. MZ 1200DBR has very good NCLB tolerance to protect yield. Ears are 14-16 kernel rows with exceptional grain quality. Ears have adequate husk cover and flare open to aid grain drydown. Plants have very good stay green and fall intactness in comparison to other hybrids of similar maturity. Position in and north of zone at seeding rates of 34-37ppa for optimum performance.

## Disease Ratings

Disease ratings are based on the severity of infection (9 = Excellent  
1= Poor)

Anthracnose:	7
NCLB:	8

## Product Characteristics

Early Vigour:	9
Final Population:	35-38
CHU 50% Silk:	1277
Plant Height:	Medium
Plant Health:	8
Stalk Strength:	8
Drydown:	9

## Ear Characteristics

Kernel Rows:	12-14
Test Weight:	9

Performance Data: 1 = Very Poor, 9 = Excellent

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Trecepta® RIB Complete® Corn has been approved for import into Australia/New Zealand, Colombia, China, Japan, South Korea, Mexico, Taiwan, United States and all individual biotech traits approved for import into the European Union. Please check biotradestatus.com for trait approvals in other geographies. Any other Monsanto commercial biotech products mentioned here have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for these products.
